### Instructions for Authors

**I.** Submitted articles must conform to the academic criteria. The articles are judged by the Scientific Committee of the magazine. Authors should declare in writing that the article has not been submitted simultaneously to another journal. In the opposite case is not accepted. Also, they must declare at the same time that the article has not been published in the past.

**II.** There is no limit to the permitted number of words in the body text, as the number of images, maps, diagrams, photographs and other visual material. For photos and other visual material it must be clarified by a letter that they are not bounded by commercial rights or, when this happens, that the author has them.

**III.** The articles are written in Greek, French, German, Spanish, Italian, English and Russian. Both the polytonic and the monotonic system of Greek are acceptable.

**IV.** Articles are written in Times New Roman size twelve (12) with a half line spacing (1.5). The text should be aligned to the left. In the opposite case is not accepted. The page numbering is continuous and bottom right.

**V.** The articles are sent simultaneously as doc and pdf file.

**VI.** The headline contains the title of the article, the author's name, the institution in which the author participates, and the e-mail address. The headline in Greek is first. The summary follows in Greek and English. The extent of the summary is around five hundred (500) words. Then the keywords follow. First are those in Greek. After that the body text follows. After the body of the text, the bibliography follows. The article may be accompanied by annexes, placed after the

bibliography, as with visual material list, placed after the annexes. For articles in Greek or languages retain their grammatical cases, the author's data are as follows:

HRISTOS HRISTOU Professor of the History Department @ @ @ of @ School, the National, Kapodistrian University of Athens

VASILIS VASILIOY, Professor of the History Department @ @ @ School, Aristotle University of Thessaloniki.

**VII.** The articles are accompanied by an attachment with short curriculum vitae of the author, till two hundred (200) words, which contains and the address, the telephone number, and the Skype address. These data are not announced, but remain accessible only to the magazine's director.

**VIII. Guide for the bibliography, the references and the footnotes:**

**A.** Words or phrases in ancient Greek, Latin, or in a language other than the language of the text must be written in *italics*. When the author gives emphasis on words or sentences can use expanded character spacing.

**B.** References are enclosed in square brackets, containing the author's surname, year of publication, number of pages / images / shapes. References with more than six names can be listed with the first name of the first author, followed by et al. Παράδειγμα: [Dobbs, 1983, 13-15], [Freeth *et al*, 2006, 320].

**Γ.** The abridgements are included either in double quotes form ("..."), if it is in English, French, German, Spanish, Italian or Russian or in the form of double quotes («...»), if it is in Greek.

**Δ.** When the references are given as footnotes then they are written in Times New Roman ten (10) and line spacing (1.25) while they are numbered consecutively. For sources and studies often cited, after the first report, other reports can contain the author's surname, followed by op. cit. and the number of pages. If the title of the project is not mentioned in the preceding footnote, the footnote number in which the title appears is given in parentheses. If in the same footnote are mentioned several projects by the same author, then the name refers to the first project, followed by *the same* or *himself*.

**Ε.** The bibliography contains separately primary and secondary sources. If the Greek titles are listed along with English, the authors are classified according to the Latin alphabet, due to the author's surname. If the project has been issued to different publishers, publishers are given, separated by a dash (-). If the project has been reissued, the first year of edition is given in

parentheses, and then following the year of re-edition. For reports to be published, or without edition date, are used the (under publication) and (undated).
